## TRAFFIC SIGNS

Drivers continuously complain about the annoyance of traffic signs and signals. However, we must realize that traffic signs and signals are absolutely necessary if today's traffic continues to move safely. In addition, it's the LAW. The following will show you the functional meaning of each basic type of traffic signs:

This eight-sided OCTOGON shape means "STOP".

The TRIANGLE sign means that the vehicle must "YIELD".

The DIAMOND shaped sign is a "WARNING" of hazards ahead.

This ROUND shape sign warns you of a RAILROAD CROSSING ahead.

RECTANGULAR or SQUARE signs are regulatory or information signs.

The lighted TRAFFIC CONTROL SIGNAL controls the movement of traffic at intersections. Red means STOP—Green means GO—Yellow means CAUTION.

As a PROFESSIONAL DRIVER it is your responsibility to observe and obey traffic signs. Paying attention to your driving will allow you to observe signs before the action is required. Traffic signs will help you identify potential hazard areas ahead of time in area's which are not know to you. By paying attention and obeying traffic signs, a professional driver can avoid costly fines and potential accidents.

**SAFETY IS A SURE "SIGN"**
